EXAMINER'S AMENDMENT AND ALLOWANCE

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas F. Presson (Reg. No. 41,442) on May 26, 2005.

The application has been amended as follows:

Amend claim 1 as follows:

At line 2, before the limitation "image" insert "an" - -

Amend claim 25 as follows:

At line 2, before the limitation "image" insert "an" - -

Amend claim 49 as follows:

At line 3, before the limitation "image" insert "an" - -

Allowance

2. Claims 1-51 and 53-67 are allowed. The claims will be renumbered as 1-66.
3. The following is an examiner's statement of reasons for allowance: with respect to claims 1-4, 16-18, 25-28, 40-42, 49-51 and 64, as applicants properly point out, on page 31 of the remarks, that Shimada does not disclose or suggest extracting the predetermined pixel as a pixel existing in the feature region in the feature region, when a dynamic range is greater than a predetermined value. Hence and in view of applicants' arguments, amendment, and in

combination with all of the other elements of the claims, the 102 rejection thereof to claims thereof 1-4, 16-18, 25-28, 40-42, 49-51 and 64 is withdrawn, making claims 1-4, 16-18, 25-28, 40-42, 49-51 and 64 allowable over the closest prior art of Shimada.

With respect to claims 5-15, 19-39, 43-48, 53-63, and 65-67, upon acquiring an image region of an object, the claimed invention extracts a feature region in accordance with a luminance distribution of pixels adjacent to a predetermined pixel, and classifies each pixel existing in the feature region into one of a plurality of classes. After the classification, the claimed invention creates an objective frequency distribution table, which shows a frequency distribution of pixels in each class, and then based on the objective frequency distribution table, the claimed invention determines an orientation of the object. These features in combination with all of the other elements of the claims are not disclosed or fairly suggested by any of the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
